Rooted in Agroecology. Growing Sustainable Futures.

Bold Moves, Real Results

Nevhu
ROOTED IN SOIL & COMMUNITY

NeVhu is a youth-led agroecology initiative empowering young people to build sustainable livelihoods through climate-smart agriculture, environmental stewardship, and green entrepreneurship. We work with communities and partners to equip youth with practical skills, promote biodiversity, strengthen food systems, and inspire locally led solutions that benefit both people and the planet.

Let's Build Together

Partner with NeVhu to support youth empowerment, agroecology, sustainable food systems, and climate action. Get in touch to explore opportunities for collaboration.

Our Vision

A Zimbabwe where young people lead the transition to sustainable food systems, resilient communities, and thriving green enterprises.

Our Mission

To empower young people with practical agroecology skills, environmental knowledge, and entrepreneurial opportunities that create sustainable livelihoods while protecting the environment.

The Context

39.3% — Youth (15–24) unemployment in Zimbabwe.

47.6% — Youth (15–24) are not in employment, education, or training (NEET).

58.5% — Of employed Zimbabweans work in the informal economy.

20.7% — National unemployment rate (15+ years).

Theory of the Problem

Young people face rising unemployment, climate change, and limited access to practical agricultural skills, reducing their ability to build sustainable livelihoods while protecting the environment.

Theory Change

We believe that equipping youth with practical agroecology skills, entrepreneurship, and strong community partnerships enables them to create sustainable livelihoods, strengthen food security, and become leaders in environmental stewardship.

Our Programmes

Agroecology Training

Equipping communities and young people with sustainable farming knowledge and practices.

Nursery Development

Producing seedlings that support food production, biodiversity, and sustainable agriculture.

Agricultural Value Addition

Transforming agricultural products into marketable products while creating livelihood opportunities.

Youth Empowerment

Supporting young people with skills, knowledge, and opportunities to pursue sustainable livelihoods.

Climate Education

Building awareness and action around climate resilience, environmental stewardship, and sustainable food systems.
